

# N° 8

## Spring and the Cycle

chorus:

*In the cycle of seasons  
most people like Spring.  
It signifies rebirth  
of so many things.*

*When Spring arrives  
and the weather turns warm  
plants start to bloom.  
Many babies are born.*

Frogs' eggs become tadpoles  
which grow into frogs  
and puppies are born.  
They grow into dogs.

And birds gather twigs  
to build their nests.  
They keep their eggs warm  
with a much needed rest.

And the seeds that lay dormant  
beneath frozen snow  
rejoice in the sun's warmth  
and start to grow.

chorus:
